

# 1 Main Category: Environmental Site Measures

## 1.1 Sub-Category: Buildings

hybrid wood-design buildings: 3  
glass building with geothermal cooling in summer: 1  
building plus energy buildings: 1  
use of recycled building materials: 5  
energetic structural restoration of existing buildings: 4  
net-zero energy supply of buildings: 1

## 1.2 Sub-Category: Greenery

greenery to offset sealed surfaces: 2  
roof greenery: 10 (1 case of roof greenery being required by local authorities)  
ground-level greenery: 8 (1 case of greenery being used to limit noise emissions ; 2 cases of greenery being used to achieve passive site cooling)

## 1.3 Sub-Category: Biodiversity

planting of a meadow orchard: 1  
planting of meadow and composting of cut grass: 1  
renaturation projects with a regional conservation association to offset the size of on-site sealed surfaces: 1  
specific mention of not having engaging in biodiversity measures: 1  
supporting environment/climate protection projects: 1

## 1.4 Sub-Category: Sealed/Unsealed Surfaces:

unsealing parking space: 1  
unsealing roads: 1  
unsealing unused surfaces: 1  
planning with minimal sealed surfaces: 1  
replanning site layout before sealing more surfaces: 1

## 1.5 Sub-Category: Water

rain water utilization systems: 3 (1 case of ponds used as storm water tanks ; 2 case of a seepage reservoir ; 1 case unspecified ; 1 retention system to offset on-site climate change)  
on-site waste water treatment to preserve ground water: 2 + 1 mention of waste water not being treated yet, but this potentially being changed in the future  
use of water cisterns for thermal regulation: 1  
unutilized bodies of water: 3 (1 lake, 2 rivers)
